

PATIENT ADVICE CARD	
DATE:	
NAME:	
MIN:	
STOP-C ID:	
UNIT:	
Your recent test results are:	
Hepatitis C	
Antibody:	NEGATIVE
RNA:	NOT TESTED
<i>This means you have never been infected with hep C. You can be infected if you have blood-to-blood contact with someone who has hep C.</i>	
Hepatitis B (Surface Antigen): NEGATIVE	
<i>You are not infected with hep B now. If you are susceptible to hep B (have not been infected in the past or have not been vaccinated) you will be called up to the clinic for a hep B vaccination.</i>	
HIV (Antibody):	NEGATIVE
<i>This means you have never been infected with HIV. You can be infected if you have blood-to-blood contact with someone who has HIV.</i>	
You will be called up to see the STOp-C Research Nurse again in 6 months.
